ACTA ET COMMENTATIONES UNIVERSITATIS TARTUENSIS DE MATHEMATICA
Volume 30, Number 1, June 2026

Contents

Sugata Adhya and Atasi Deb Ray, *On a generalization of quasi-metric space* 5

Abhijit Mandal, Ameth Ndiaye, Adel Mohammed Ali Al-Qashbari, Moctar Traore, and Mustafa Yıldırım, *Characterizations of ρ-Einstein solitons on LP-Sasakian manifolds admitting the Zamkovoy connection* 19

Somayeh Tahaghoghi Arab and Shahroud Azami, *Ricci solitons on spacetimes with the spatially homogeneous rotating metrics* 39

Yuvashree Balamurugan and Suja Krishnamurthy, *On α-order λ-statistical convergence and some inclusion theorems in non-Archimedean 2-normed spaces* 61

Akansha Tyagi, Sachin Vashistha, and Mohammad Akram, *AT algorithm for fractal polynomiographs: a study on fast convergence under weak contraction mappings* 75

Sylvain Attan and Nabil Oro Djibril, *Cohomologies and linear deformations of relative Rota–Baxter operators on pre-Jacobi–Jordan algebras* ... 95

Nauman Ahmed, Muhammad Z. Baber, Armando Gallegos, Jorge E. Macías-Díaz, Naveed Shahid, and Shazia Umer, *Abundant families of exact wave solutions for the time-fractional Estevez–Mansfield–Clarkson equation* 121

Le Xuan Hung, *The connected niche graphs of split tournaments* 143

Ali Olaikhan, *Closed-form expressions for polylogarithmic integrals and related harmonic sums* 155

Fatih Nuray, *Lacunary strong Riesz summability* 179

Jaan Kristjan Kaasik, *A note on attaining diameter two properties in Lipschitz-free spaces* 193

Jaagup Kirme, *Stability of properties α and β under absolute sums of Banach spaces* 201

Rainis Haller, *Correction to: Convergence analysis of an inertial method for a system of general quasi-variational inequalities under mild conditions* ... 227
